

Water is essential to sustain life on earth, yet only 3% of the earth's supply is fresh water

EarthMinded™

The EarthMinded™ RainStation™ is a simple-to-use and attractive solution for home rainwater collection and storage. Our large capacity 60-gallon rain barrel connects to your downspout and automatically collects runoff water from your home's roof. This water is ideal for watering plants and gardens, and for doing outdoor chores.

The RainStation™ offers many convenient features:

- Extra large 60-gallon capacity
- Includes FlexiFit™ diverter, fill hose, spigot and garden hose connector
- Large opening lid with locking feature for safety
- Durable construction for years of trouble free use
- Available in 2 colors: 100% Recycled Black and Evergreen

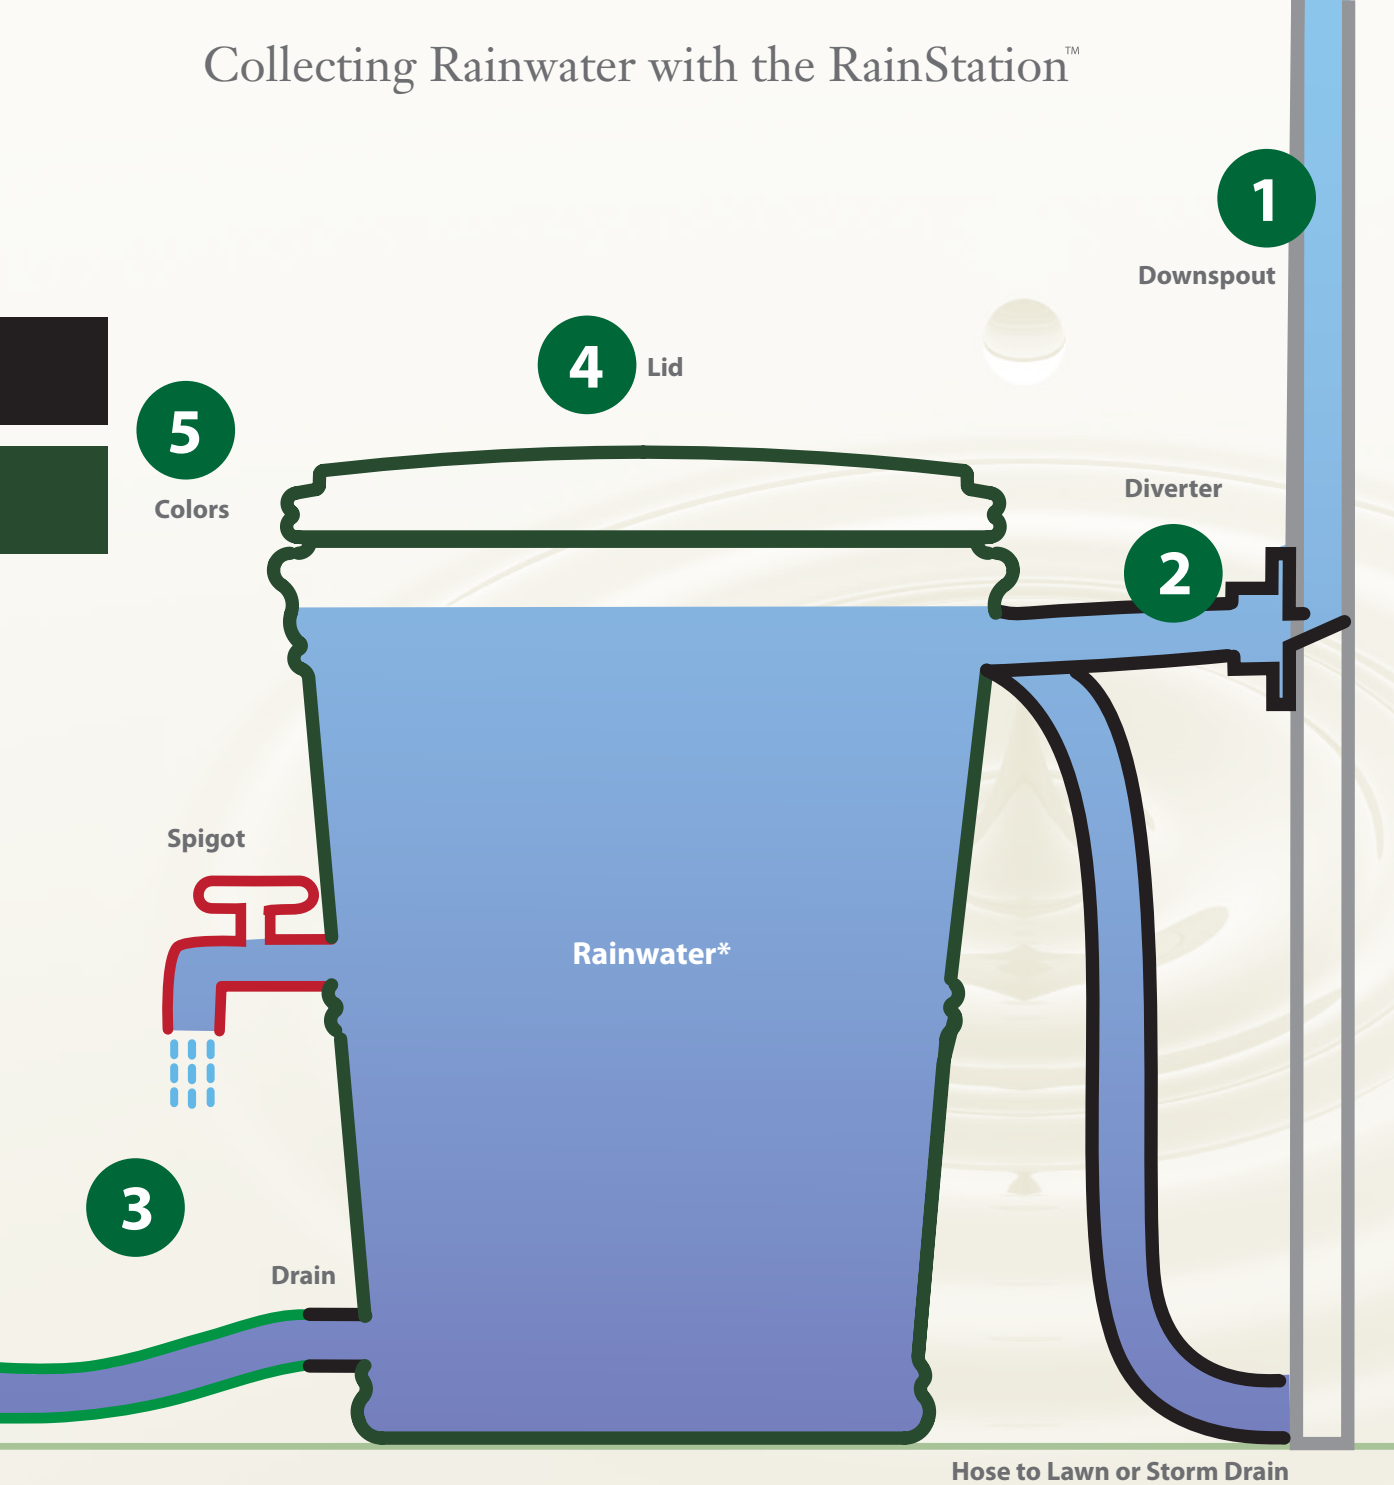

**HOLE
SAW
INCLUDED!**

Now there is an easy way for everyone to capture free rainwater for outdoor use and help conserve our fresh water supply

Collecting Rainwater with the RainStation™

*Rainwater is not suitable for human or animal consumption

The EarthMinded™ RainStation™ uses gravity and some unique features to collect rainwater from your rooftop.

- 1 Rain falls through your downspout from rooftop.
- 2 Unique FlexiFit™ diverter directs rainwater into the barrel. A second hose drains excess water from the barrel out to your storm drain or your lawn. The diverter is easily removed from downspout and a winter hole cover is included.

- 3 Spigot makes it easy to fill a watering can. Drain lets you empty the rain barrel and attach a garden hose or soaker hose for watering beds and flowers.

- 4 Lid locks for safety.

- 5 RainStation™ is available in 2 colors: 100% Recycled Black and Evergreen
